

## Cypress Creek Medical Pavilion

### Project Profile:

Cypress Creek Medical Pavilion (CCMP) a 82,000 sq. ft. multi-tenant medical center located in Ft. Lauderdale, Florida. It is home to an urgent care center, offers imaging services, physical therapy and various physician offices will complement the state-of-the-art Ambulatory Surgery Center. For patients, CCMP will provide the benefit of a complete array of quality healthcare products and services in one convenient location, meeting all their health and wellness needs, while catering to their active lifestyle.

### Building Challenge:

The idea for CCMP was born from the need for efficient medical service in the Cypress Creek area. The developers followed a strategic plan, which is complemented with access to airports to accommodate the growth of medical tourism. Following a strategic plan which is complemented by access to airports and the growth of medical tourism.

VT Industries' Architectural Wood Doors were specified by the architect, Gresham Smith. The doors were manufactured for and installed by the Lotspeich Company of Florida, a long-time distribution partner of VT Industries.

### VT's Contribution:

VT provided a total of 33 doors for the Cypress Creek Medical Pavilion project. Several flush doors were selected for this project including: doors with ratings of 45-minute and 90-minute, particleboard cores, 5-ply construction, barn doors and doors featuring rainglass.

We make beautiful, high-performing doors.
