Seeing the forest for the trees.

100% pre-consumer recycled SkyBlend cores
Low-emitting GREENGUARD Certified laminates
FSC® certified • Low-emitting, water-based adhesive

EQ *countertops*

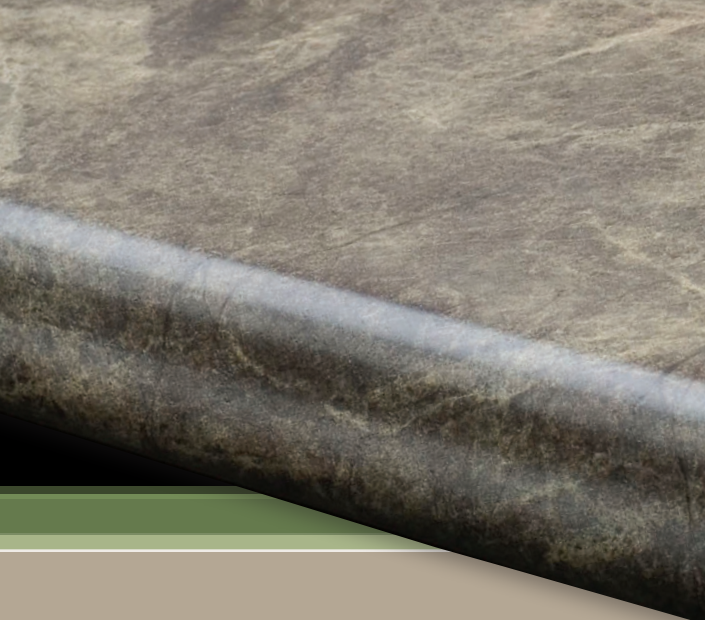

A RECYCLED WOOD FIBER, FSC® CERTIFIED CORE

EQcountertops cores are made of FSC certified, 100% pre-consumer recycled particleboard, with no added urea formaldehyde, including SkyBlend cores. SkyBlend cores are tinted blue for easy identification in the field. And, by using our sustainable particleboard, you lose nothing in durability.

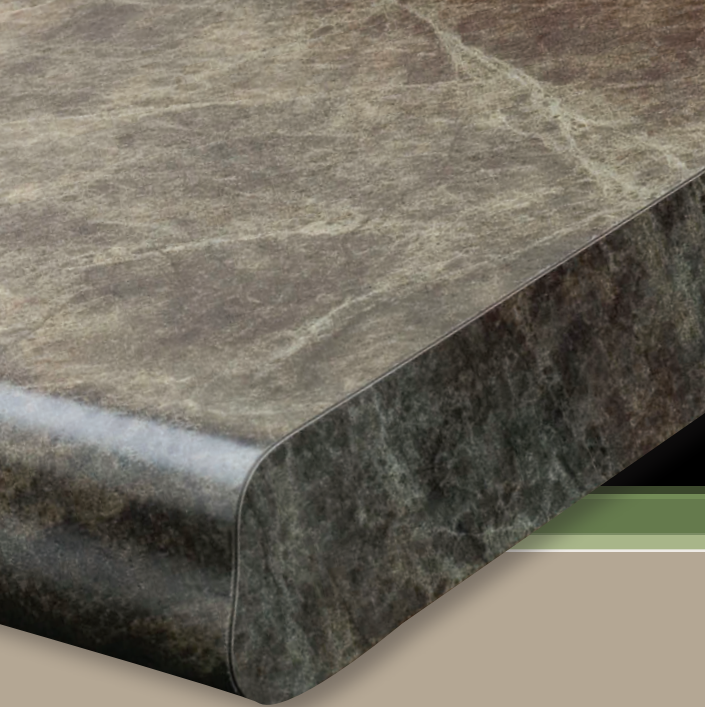

GREENGUARD CERTIFIED LAMINATES

The laminate surface of EQ*countertops* not only provides a durable, high-quality countertop surface, it's GREENGUARD Certified as well, which means significantly diminished harmful emissions. We proudly use certified GREENGUARD laminates from all the major brands—Formica®, Nevamar®, and Wilsonart®.

A SAFE, SUPERIOR ADHESIVE

EQ*countertops* use water-based adhesives to bond the laminate to the particleboard. These adhesives eliminate unsafe Volatile Organic Compounds (VOCs), which helps improve indoor air quality.

VT INDUSTRIES STRIVES TO KEEP THE EARTH GREEN

The LEED® Green Building Rating System™ is a points-based national standard for developing high-performance, sustainable buildings. At VT Industries, we're committed to developing material options concurrent with LEED certification criteria, to help assist you with both your commercial and residential project needs.

Naturally beautiful. Environmentally friendly. And available at a price that won't break your project's budget. With EQcountertops by VT Industries, you can count on getting all of this and more. While all of our countertops are GREENGUARD Indoor Air Quality Certified,[®] EQcountertops are the first and only GREENGUARD Children & SchoolsSM laminate countertop products available, meeting the most stringent emission standards.

EQcountertops assist in achieving Leadership in Energy and Environmental Design (LEED[®]) certification. So, for both your commercial and residential projects, you can keep the earth green by choosing the environmentally friendly features of EQcountertops:

- 100% pre-consumer recycled SkyBlend cores
- Low-emitting GREENGUARD Certified laminates
- Low-emitting, water-based adhesive
- FSC[®] certified
