

20-MINUTE THROUGH 90-MINUTE FIRE DOORS WITH PROTECTION PLATES UP TO 48"

Protection (kick) plates of brass, bronze, steel, stainless steel, PVC cladding, Acrovyn™, or aluminum may be applied with adhesive or fully-threaded wood screws. Protection plates can be applied to one or both faces.

Kick plates between 16" and 48" must be listed to meet VT fire approvals. 45-minute, Particleboard core doors only approved up to 16".
