

VT INDUSTRIES AWI QUALITY CERTIFICATION PROGRAM (QCP)

The AWI Quality Certification Program, (QCP) is a quality assurance system that ensures the architectural woodwork within a project is fabricated, finished and/or installed in accordance with the quality criteria set forth in the architectural specifications and the AWI Quality Standards.

VT became a QCP member through comprehensive testing, facility inspection and the ability to demonstrate that VT can fabricate and finish Architectural Wood Doors to AWI Quality Standards.

The QCP was developed for voluntary acceptance by the design and specification community. VT can supply a letter documenting our Architectural Wood Doors were manufactured to the exacting quality standards set forth by AWI.

However, the Certification becomes mandatory when included by direct reference in the project specifications. In this case VT can initiate project-specific Quality Certification labels and/or Certificate of Compliance. This will entail extra charges based on size of project and possible AWI compliance inspections if requested. Contact your CSC representative for more information.

For a project to be considered for AWI QCP Certification Architects must register the project with AWI QCP before VT can proceed.
