

HIGH PRESSURE DECORATIVE LAMINATE (HPDL) DOOR EDGE AND LITE MOULDING OPTIONS

VT offers the following edge and lite moulding (woodstop) options for our laminate doors:

High Pressure Decorative Laminate

HPDL is the standard edge offering the exact match to the laminate face, along with providing impact and wear performance associated with HPDL. As the leading manufacturer of laminate wood doors in the industry, VT has supplied laminate edges for many decades covered by VT's lifetime warranty for workmanship and materials. Lite moulding will be painted to match as standard on HPDL doors. White Maple lite moulding will be provided unless otherwise specified.

Painted to Match

As standard VT will paint edges to match when "Painted" edges are ordered. Painted edges provide the best color match and aesthetic with a finished edge option. White maple edges are painted per laminate manufacturer suggested colors and paint formulas are kept on file for consistency across all orders. Lite moulding will be painted to match as standard when "Painted" edges are ordered. White Maple lite moulding will be provided unless otherwise specified.

Unfinished

White Maple edges are available for field finishing. White Maple is used to provide the most consistent color for finishing. VT does not warranty the appearance of field finished edges.
