

LABELING OF ACCESSORIES

Door accessories supplied by VT Industries will be packaged separately from doors and may not be included on door pallets. Accessories may be supplied by a variety of vendors including, but not limited to, All Metal Stamping, Air Louvers and NGP. Accessory packages are identified with a VT Industries label as shown in some examples below.

If door accessories have been shipped to VT from the vendor, view the shipping label on the box received. The Customer name is typically identified as either the item number or name.

Fire Clips and Nails:

Fire clips and nails are packaged in cardboard boxes and marked appropriately. If doors have lite cutouts large enough to contain them, boxes are placed inside the cutouts. If door cutouts are too small, the fire clips/nail boxes are shipped loose.

Metal Vision Panels:

Metal vision panels arrive boxed. Boxes include two vision panel frames per lite opening and hardware to attach frames to door. Glass is supplied by others.

Metal Edges & Astragal Sets:

Metal edges and astragal sets arrive wrapped and boxed. They are not wrapped with VT label tape but may carry a label indicating VT door accessories are contained inside.
