

MANUAL EXTENSION FLUSH BOLTS

---

VT Industries has approval to prep listed and approved extension flushbolts, corner mounted flushbolts and surface applied flushbolts in doors rated 20 through 90-minute.

Fire Rated Doors

Extension flushbolts can have up to a maximum of 36" extensions on doors 20 through 90-minute. Fire-rated agrifiber doors are limited to 12" extensions. Although extension flushbolt hardware manufacturers listings may state for metal doors, VT has the approval in our procedures, which supersedes the hardware listings.
