

JOBSITE RECOMMENDATIONS FOR MATCHING VT WATER-BASED STAINS

VT will not supply its water-based stains for field use. VT recommends contacting a reputable finishing supplier (Sherwin Williams, Diamond Vogel, etc.) with a sample to match and having the finishing supplier mix a wiping stain for field use. This will be easier to work with and provide the customer with better results.

VT's water-based stains are not applied like the wiping stains used by field finishers. Therefore, using water-based stains on the jobsite will not provide the same results as in the factory finishing area of VT's mill.
