# HPDL

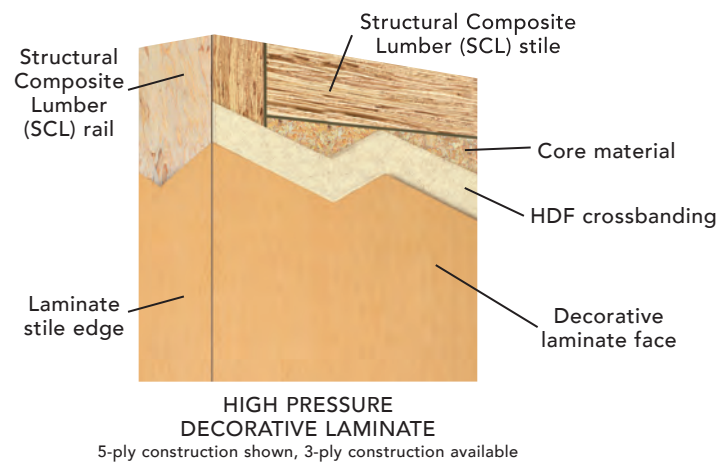

## Beauty & VERSATILITY

# Reconstituted Veneer

## Consistent DESIGNS

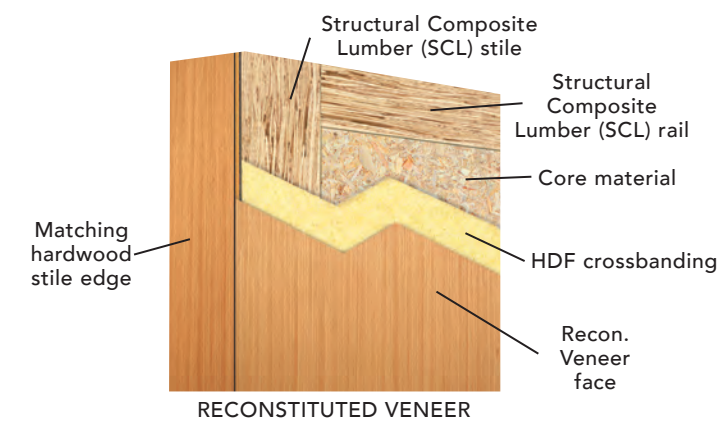

Beauty, Durability, and Value. That's what you get with VT High Pressure Decorative Laminate (HPDL) doors. With hundreds of laminates to choose from, HPDL doors are a great, versatile option for your next project.

- Consistent appearance from opening to opening
- 5-ply and 3-ply construction available
- Non-rated, 20-, 45-, 60- and 90-minute fire ratings
- Matching laminate for top and bottom rails available
- Popular laminates kept in-stock for faster turnaround times
- Custom laminate capabilities available
- Full array of patterns, solid colors, and wood grain laminates
- Limited lifetime warranty

A reconstituted veneer door, also known as an engineered veneer door, is a door faced with a man-made veneer. Reconstituted veneers are sustainable alternatives to traditional wood veneers, however this real wood alternative is derived from fast growing trees that is processed to reflect the look and feel of natural veneers. Reconstituted veneered doors are a great option for any project, especially large-scale projects where color consistency is of extreme importance.

- Color and grain consistency
- Free of knots and grain imperfections
- Environmentally friendly selection
- Achieves the desired look and feel of natural veneers
- Budget-friendly alternative
- Non-rated, 20-, 45-, 60-, and 90-minute fire ratings
- Easy maintenance
- Limited lifetime warranty

# Stylus

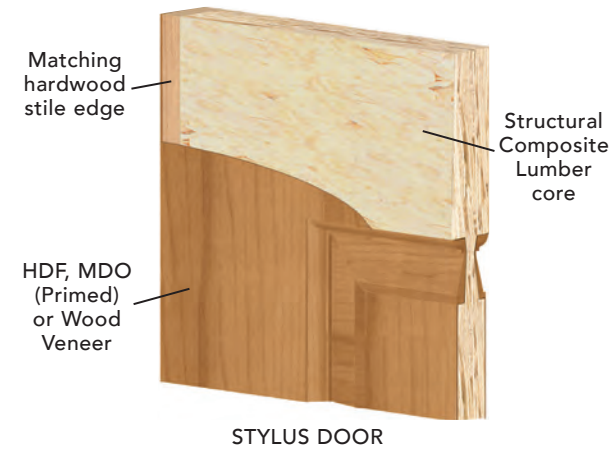

## Budget-Friendly *Style*

# Architectural Solutions

## *Upgrade* YOUR PROJECT

Achieve a beautiful aesthetic at an affordable price. VT Stylus doors provide the superior quality of 5-ply flush doors with the elegant appearance of stile and rail doors at a cost that's friendly to your budget, making these doors perfect for hotels, schools and multifamily housing.

- Available with a variety of panel layouts, with, and without lites
- Two standard mouldings available, or match your custom moulding
- Core types include: Particleboard and Structural Composite Lumber Core
- Acoustic ratings up to STC 33
- Non-rated and 20-minute fire rating
- Limited lifetime warranty

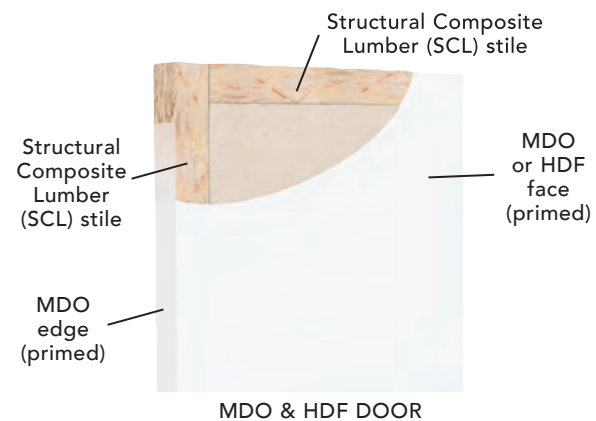

STYLUS DOOR

# MDO & HDF

Medium Density Overlay (MDO) and High Density Fiberboard (HDF or Hardboard) are face options commonly used when opting for an opaque finish.

- Provides a smooth, less porous surface for painting
- Non-rated, 20-, 45-, 60-, and 90-minute fire ratings
- Budget-friendly

MDO & HDF DOOR

### ACOUSTICAL

When sound reduction is required, VT acoustical doors are the perfect solution. Available with ratings ranging from STC-28 to STC-52, they're available with either high-pressure decorative laminate or wood veneer faces. All VT acoustical doors are tested operable with gasketing.

### FIRE RATINGS

VT fire-rated doors meet or exceed life safety requirements while maintaining the visual integrity of the door without sacrificing your design. VT's concealed intumescent provides the same seamless elegance as our non-rated doors. And they're available with ratings up to 90-minutes and double egress pairs.

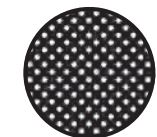

### BULLET-RESISTANT

VT's bullet-resistant doors are the ideal solution to ensure additional safety. Whether it's a school or government building, the added layer of protection from VT is a must. VT offers ballistic ratings 1-8 (per UL 752) and levels IIA-III (per N.I.J. 0108.01) and up to a level 3 with a 20-min fire rating.

### LEAD-LINED

VT lead-lined doors are essential when your project includes areas where radiation exists. Our lead-lined doors are available with wood veneer or high-pressure decorative laminate faces to match all of the other doors in your project. They also meet up to a 45-minute fire rating.

### FOAM CORE

VT's foam core door features a lightweight, yet very durable, foam-based construction. Approximately 2x's lighter in comparison to traditional wood core doors, foam core doors place less stress on the door frame and are easier to transport and install.

## Elevated DESIGN

## Why VT?

## Quality CRAFTSMANSHIP

At VT Industries, we pride ourselves on the quality construction of each and every door that leaves our facilities. To complement our high level of meticulous craftsmanship, we have a passion for innovation and utilize the latest technologies in our state-of-the-art facilities. Our manufacturing process is incredibly efficient and produces very little waste. This means you get premium-quality doors at the most affordable price possible. And to add even more value, each door comes with pre-drilled pilot holes as well as factory-sealed top and bottom rails, making them ready to install.

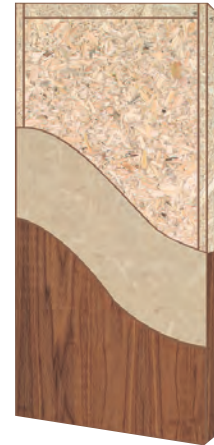

- Meets WDMA/AWS custom grade quality standards
- Individually double-hot pressed for maximum strength and durability
- Factory machining of predrilled pilot holes for hinges and faceplates assures quick, accurate installation
- Factory-sealed top and bottom rails to protect doors from moisture
- On-time, reliable delivery on dedicated VT trucks by dedicated VT drivers
- Consistent and comprehensive factory finish offering
- Manual inspection to ensure quality standards are upheld

## World-Class SERVICE

Since 1956, VT Industries has prioritized exceptional customer service as a cornerstone of our business. Our dedicated teams view every interaction as an opportunity to build lasting relationships and fulfill the needs of our customers in a meaningful way. In an age where exceptional service is rare, we pride ourselves on being easy to do business with.
