

# Project *Spotlight*

## SOUTHEAST HEALTH: DOTHAN, AL

Southeast Health (formerly Southeast Alabama Medical Center) is a premier health center located in Dothan, Alabama. In 2018, Southeast Health took initiative to improve the guest experience by renovating the medical-surgical patient care unit. With a coffee station, recliners, modern sofas, and scenic decor, the new renovation improves the area's aesthetic by bringing a new level of comfort - making guests feel more "at home".

### VT'S CONTRIBUTION:

VT Industries partnered with a local distributor, Door Products, to provide 207 architectural wood doors for the newly remodeled area. Southeast Health chose to install VT's Palladium® doors

for ultimate durability and performance. The warmth and beauty of the Beechnut 0539 Woodland Series Factory Finish provided the perfect complement to the new area's cozy aesthetic. The vinyl-clad fixed edges selected provided Southeast Health with additional impact protection. The doors were hung with AD Systems hanging hardware.

### ABOUT PALLADIUM:

VT's Palladium® door is a supremely durable door that withstands high amounts of traffic and abuse while maintaining an attractive decor. With the option of a fixed or removable edge, Palladium® offers customers complete versatility when looking for a high-impact resistant door.
