HPL (HIGH PRESSURE LAMINATED) PANELS INFO

It is important that as a buyer and/or an end fabricator, you are informed of the potential liability possibly affecting the performance or appearance which could be the result of a non-standard panel and/or panel component lay-up.

PANEL LAY-UP

Please note that by accepting this quote from VT Industries, Inc. that as a buyer or end fabricator you understand the potential liability possibly affecting the performance or appearance of the quoted products:

- VT INDUSTRIES, INC. WILL NOT ASSUME ANY LIABILITY ON PANELS AND/OR PANEL COMPONENTS WHICH ARE LAID-UP WITH A GLOSS FINISH VG HPL. THIS IS DUE TO THE POSSIBILITY OF SUBSTRATE OR ADHESIVE TELEGRAPHING, WHICH CAN DISTORT THE SHEEN OR GLOSS OF THE FINISH.
- VT INDUSTRIES, INC. WILL NOT ASSUME ANY LIABILITY ON PANELS AND/OR PANEL COMPONENTS ORDERED WITH A RAW SIDE. RAW SIDED PANELS ARE UNBALANCED ALLOWING MOISTURE TO PENETRATE THE RAW SIDE WHICH CAN CAUSE PANELS TO WARP; THIS IS ESPECIALLY TRUE IN PLYWOOD CORE LAY-UP.
- VT INDUSTRIES, INC. WILL NOT ASSUME ANY LIABILITY ON PLYWOOD PANEL COMPONENTS WHICH ARE LAID UP USING POST-FORM, VERTICAL GRADE LAMINATE, STANDARD GRADE LAMINATE, TO INCLUDE CABINET LINER GRADE HPL, DUE TO THE POSSIBILITY OF TELEGRAPHING.
